- Minimizing business risks

4. PUBLIC CHARGING

- All charging on the same invoice

- All charging on the same invoice
- No need to deploy the internal finance team

MAINTENANCE SERVICES IN CHARGING

IDENTIFICATION

Identification using an RFID tag or the mobile application and assigning the charging costs to the charger.

PAYMENT AND ACCOUNTING OF CHARGING EVENTS

Charging events are charged from the credit card of the identified charger and further accounted to the owner of the electricity connection, based on how much time or energy has been spent on charging and how the property owner has determined the price of electricity.

MONITORING OF CHARGING EVENTS

Real-time monitoring of charging events and charging history in the Plugit App mobile application.

CUSTOMER SERVICE

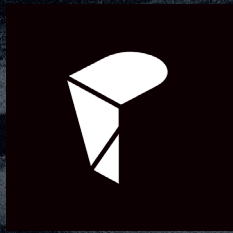

The customer service is available 24/7 in urgent situations at tel. +358 20 350 330. The customer service can start and end charging, unlock the charging cable from the charger or restart the charging station as well as provide advice with payment issues.

REMOTE SUPPORT FOR CHARGING STATIONS

Charging equipment updates and remote support for charging equipment through the customer service in case of problems.

MAINTENANCE

Necessary maintenance visits are made within 3 working days of the contact and are free of charge during the on-site guarantee. 2-year on-site guarantee. Maintenance visits outside the guarantee period according to a separate price list.

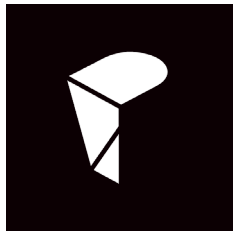

CHARGING

STANDARD COMPANY CHARGING 22 kWh

This is the regular and primary method for charging electric vehicles. Standard charging (Type 2) means EV charging using a fixed charging system. Employees' and visitors' vehicles are charged during the working day, company cars overnight.

FAST CHARGING 50 kWh

Fast charging is necessary when there is a limited amount of time available or the amount of energy that needs to be charged is significant. Choose fast charging when you want to serve customers by offering a fast charge of less than one hour.

HOW TO CHARGE

- 1. CONNECT THE CABLE**
Connect the cable to the vehicle and to the charging station.
- 2. IDENTIFY YOURSELF**
Identify yourself using either the Plugit App on your phone or a tag.
- 3. CHARGING STARTS**
Charging starts as soon as you have been successfully identified and the cable is connected properly. You can check your mobile app to make sure that charging has started.
- 4. STOP CHARGING**
When you want to stop charging, first unplug the cable from the vehicle and then from the charging station.

PUBLIC CHARGING MAKING LIFE EASIER

Our customers can enjoy our roaming feature, which allows us to serve our private and corporate EV customers even better.

EV drivers can charge their vehicles with one charging key not only at Plugit's own public charging stations, but also the charging stations of numerous other operators. For our corporate EV customers, this means that they can take care of their charging costs with only one invoice, without any administrative hassle or endless piles of receipts. Charging sessions are compiled on one invoice and the EV driver or employer does not need to sort through charging invoices from several different places or apps.
